BUILDING MATERIALS

can ease

your Building Problems

The Australian wide organisation of Wunderlich Limited, through its Sales and Technical staffs, will gladly advise Homebuilders about the use of its products, as illustrated in this booklet, in the erection of a Modern Home.

Intending Homebuilders are invited to call at its Showrooms, inspect examples of the range of Wunderlich Building Materials and discuss their requirements.

Country residents are requested to write for copies of free booklets, leaflets and price list, descriptive of those products in which they are interested.

WUNDERLICH "DURABESTOS" ASBESTOS CEMENT BUILDING SHEETS

The adoption of timber frame construction with walls of fire resisting, vermin proof "DURABESTOS" follows sound building practice that is more economical from the cost viewpoint—a factor to be considered when arranging finance for the project—than any other form of recognised construction.

Approved by Governmental authorities, Co-operative Building Societies and other leading lending institutions, the "DURABESTOS" type of Home is now part of the Australian scene, having proved its worth from the viewpoints of economy, comfort, convenience and appearance.

FREE BOOKLET OF HOME DESIGNS
AVAILABLE ON REQUEST

WUNDERLICH "DURABESTOS" is available in large rigid sheets up to 10' long by 3' and 4' wide, together with the necessary cover mouldings.

● CEILINGS

The choice of a ceiling medium is of paramount importance ; it should be distinctive in design, free from flaking, staining, cracking or falling and one that will give a lifetime of trouble free and upkeep free service.

◆ ◆ ◆ WUNDERLICH METAL CEILINGS ◆ ◆ ◆

Available in a variety of delightful designs, Wunderlich Metal Ceilings are ideal for the modern Home. Firesafe and permanent, they afford all those advantages a home-builder desires. Once erected and painted they retain their original beauty with virtually no attention over the years.

Ask for details of designs available and a quotation for ceiling the complete Home.

Where plain effects are desired as in the kitchen, bathroom and laundry, Wunderlich "Durabestos" flat sheets can be employed with advantage.

Wunderlich Limited

ROOFING

Apart from the necessary function of protecting the home and its occupants from the weather, appearance, as well as suitability to the type and location of the house, must be given every consideration when choosing Roofing.

WUNDERLICH TERRA-COTTA TILES are recognised throughout Australia for their high quality beauty of colour and permanence and are preferred by the great majority of home lovers.

Many country residents and those building near the seashore prefer WUNDERLICH DEEP CORRUGATED "DURABESTOS" ROOFING. The large bold corrugations simulate the appearance of Mission Tiles.

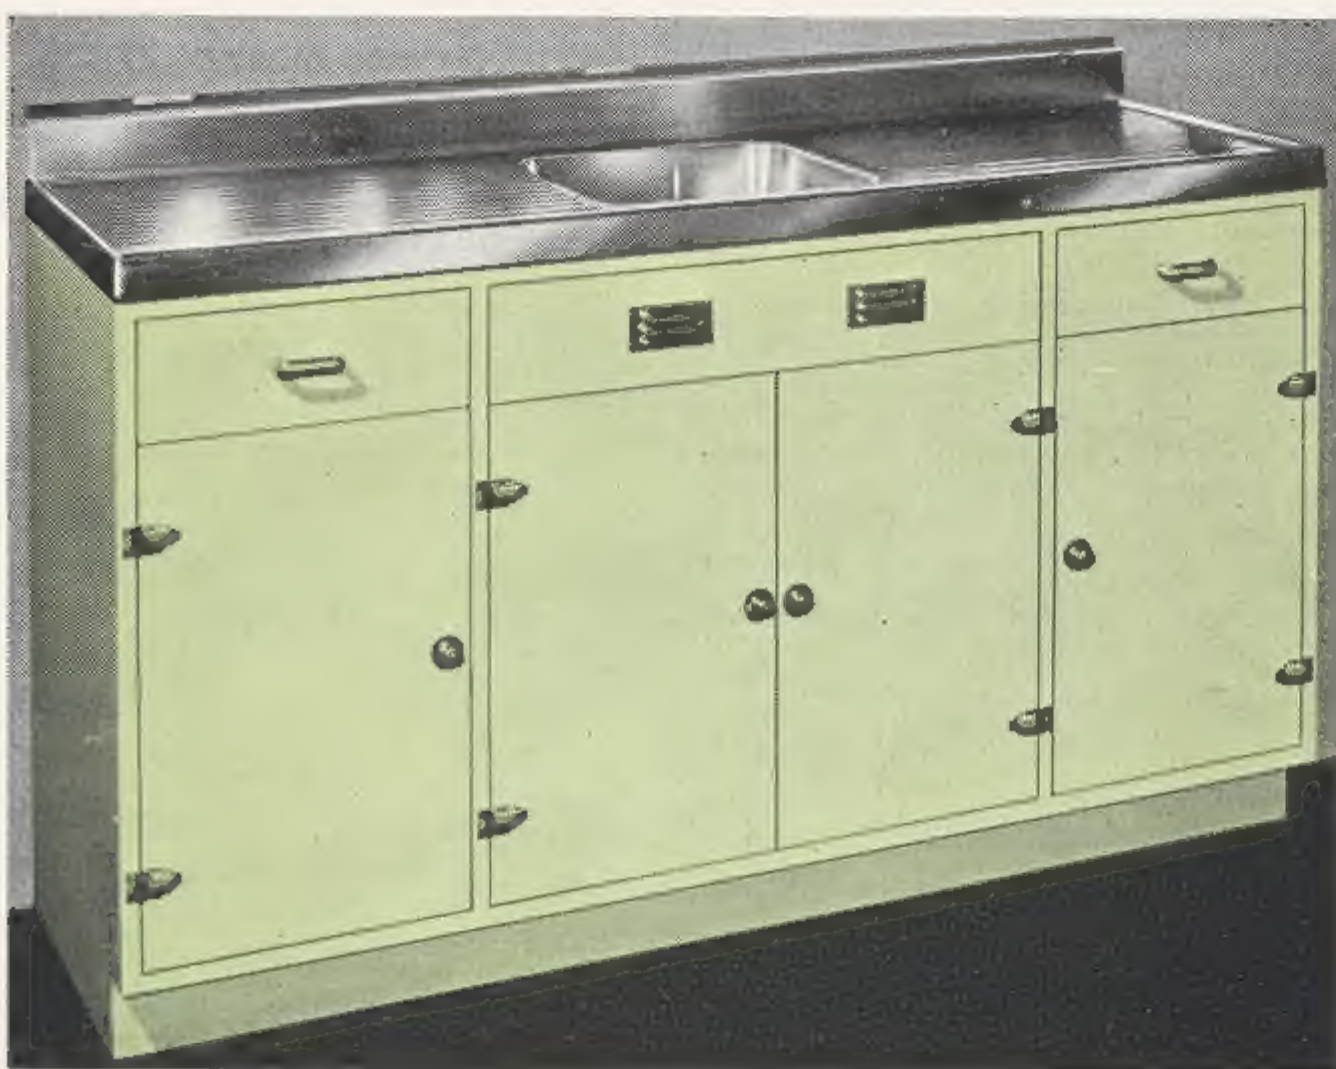

WUNDERLICH METAL TILE ROOFING, stamped from 24-gauge zincanneal to represent Terra-Cotta Tiles, then Russet Red stove enamelled, also appeals to country homebuilders, as this roofing, comparatively light in weight, inexpensive to transport and easy to fix, permits a maximum run-off of drinkable rain water.

Further details submitted on request.

FIREPLACE

Ask for Free Booklet
of Fireplace Designs.

Wunderlich Fireplace Surrounds of Glazed Terra-Cotta add beauty and distinction to the fireside. The delightful smooth surfaced glazed finish to the blocks comprising the surround is a buff mottled white that is in complete harmony with the colour and design requirements of the modern home—and so easy to keep clean and immaculate. A variety of designs is available to suit open and gas fires, Kosi, Wonderheat and Warmray stoves.

WUNDERLICH HEARTH TILES
10" x 10" x 1" in a glaze to match
the surrounds, form an ideal
outer hearth to all types of
fireplaces.
